

High Interest

Local orthopaedic surgeon **Gordon I. Groh, MD**, has developed a redesigned humeral component for the reverse shoulder prosthesis as part of a nationwide four-member surgeon design team.

Austin, Texas-based DJO Surgical will market the new RSP Monoblock shoulder system as an extension of its Reverse Shoulder Prosthesis shoulder system.

The RSP Monoblock allows surgeons to use reverse shoulder replacement surgery to help more patients, including those with fractures as well as those with painful conditions such as rheumatoid arthritis and torn rotator cuffs.

Dr. Groh, a board-certified specialist in shoulder, elbow and hand surgery practicing at Blue Ridge Bone & Joint, is a nationally recognized expert and instructor in reverse shoulder replacement and surgical treatments for various shoulder and elbow disorders.

The other design surgeons on the team were from California and Florida.

For more information on the shoulder system or reverse shoulder replacement, contact Blue Ridge Bone & Joint at 258-8800 in Asheville or 692-4318 in Hendersonville, or visit www.DrGordonGroh.com.
